eximlink COUNTRY REPORT on

TYRE RECYCLING IN CANADA

- *Have you ever intended to set up a **tyre recycling operation in Canada**?*
- *Have you ever wondered about availability of **tyres and tyre programs in Canada**?*
- *Have you ever thought about buying **tyre recycling machinery** and looked out for a **feasibility comparison** of different technologies?*

In this eximlink COUNTRY REPORT on **TYRE RECYCLING IN CANADA** A. Pehlken and E.Essadiqi have developed a clear picture of the tyre recovery and recycling situation in Canada and very importantly also shed light on the environmental impacts - including greenhouse-gas omissions (GHG) - of current and future practices.

For this study of "Tire Recycling in Canada" data from the provinces and the Canadian Association of Tire Recycling Agencies (CATRA) were collected from August 2004 to February 2005. This report shows there is a great market potential for the processing of scrap tires into new applications and value-added products. Thanks to well-operated tire programs in nearly every Canadian province (only Ontario is currently developing its program), scrap tires are now being processed using several techniques.

Rubber Granulate users will get an overview about the supply situation in Canada.

Rubber Granulate suppliers will be able to get a clear picture about tyre programs and regulations in Canada.

Tyre recycling investors will learn about the currently applied technologies and the different location characteristics for their venture in Canada.

The eximlink COUNTRY REPORT on **TYRE RECYCLING IN CANADA** can be ordered for EUR 185.00 or GBP 130.00 per copy (excluding VAT if applicable) and is NOW available.

TABLE OF CONTENTS

	Page
1 INTRODUCTION	1
2 THE TIRE	2
2.1 TIRE MANUFACTURE	2
2.2 TIRE COMPOSITION	2
2.3 MATERIAL DESCRIPTION OF RUBBER, STEEL AND FIBRE	4
3 TECHNICAL SOLUTIONS FOR SCRAP TIRE HANDLING & THEIR FEASIBILITIES	8
3.1 AMBIENT GRINDING	8
3.2 CRYOGENIC GRINDING	9
3.3 DEVULCANISATION AND SURFACE TREATMENT	9
3.4 ENERGY RECOVERY – USE AS TIRE-DERIVED FUEL	10
3.5 THERMAL CONVERSION TECHNOLOGIES	12
3.6 RETREADING	15
3.7 DISPOSAL IN LANDFILL	15
3.8 FEASIBILITY COMPARISON OF THE TECHNICAL SOLUTIONS	15
4 MARKETS AND NEW APPLICATIONS	18
4.1 RUBBER	18
4.2 STEEL	22
4.3 FIBRE	23
4.4 OTHER	23
5 TIRE PROGRAMS IN THE CANADIAN PROVINCES AND TERRITORIES	24
6 MATERIAL FLOW FROM SCRAP TIRES IN CANADA	38
6.1 PASSENGER AND TRUCK TIRES	38
6.2 OFF-THE-ROAD (OTR) TIRES	40
